A 30-day, multi-component soil surfactant complex designed to reduce LDS (localized dry spots) and drought stress. The multi-chemistry design of **Tri-Wet Select<sup>TM</sup>** helps mitigate hydrophobic soils, ensures uniform hydration, and facilitates rapid re-wetting without creating excess moisture in the top few inches of the soil profile.

When used on a consistent, monthly basis. **Tri-Wet Select<sup>TM</sup>** provides superior soil moisture management and should be safe for application on all turf types, including highly maintained golf greens.

## PRODUCT BENEFITS

- Extremely uniform hydration characteristics
- Enables rapid re-wetting without excess moisture
- Increased vertical and lateral water movement
- Reduces LDS (localized dry spot)
- Non-burning formulation
- Multi-component complex for unsurpassed performance
